Re: Modine Manufacturing Company – Camdenton, MO
Quarterly Report for period ending September 30, 2011
AOC No. 99-HW-002

Dear Ms. Kump-Mitchell:

The following is a summary report of the activities completed from July 1, 2011 through September 30, 2011 at the above referenced site. This report is being submitted as required by the Corrective Action Abatement Order on Consent, Order No. 99-HW-002 (AOC) paragraphs 91 through 94.

Description of work completed during the quarter:

Modine has begun its initial evaluation of US EPA's final health assessment for trichloroethylene (TCE), released on September 28, 2011, with respect to how that guidance may impact closure activities at the Camdenton site. Completion of that evaluation, however, is dependent on US EPA's issuance of a final TCE Risk Screening Level (RSL) Table reflecting the recent health assessment findings.

Summary of findings, data, etc.:

No additional data was collected or submitted during this monitoring period.

Summary of problems or potential problems and any corrective measures implemented:

No problems were encountered during the quarter being reported.

Projected work for the next reporting period:

Modine is awaiting US EPA's issuance of a final TCE Risk Screening Level (RSL) Table which is expected in December 2011. Future actions necessary to obtain site closure under the AOC will be identified pursuant to the completion of Modine's evaluation of US EPA's final health assessment and RSL table for TCE. Those intended future actions will be communicated to MDNR.

Instances of Non-compliance with the requirements of the Order:

There were no instances of non-compliance with the requirements of the Order during this reporting period.
